Professional Summary

Results-driven Data Scientist with expertise in machine learning, data analysis, and statistical modeling. Skilled in designing predictive models, developing end-to-end data pipelines, and translating complex datasets into actionable business insights. Proficient in Python, SQL, TensorFlow, and Power BI, with hands-on experience applying machine learning techniques to solve real-world problems.

Passionate about leveraging data to optimize operations and improve decision-making in dynamic environments.

Relevant Experience

Data Analyst Trainee

Geminimet Technologies – *Remote, Bengaluru, India*

Jul 2025 – Present

- Streamlined complex data preparation workflows using advanced Excel, improving data accuracy and analysis speed.
- Delivered high-impact dashboards in Power BI and Tableau that enhanced KPI monitoring and informed strategic decisions.
- Reduced reporting turnaround time by 40% through automation of data analysis using Python (pandas, NumPy, Matplotlib).
- Enhanced query performance and reporting reliability by optimizing SQL across large datasets.
- Supported data-driven decision-making by applying statistical techniques, leading to actionable business insights.
- Ensured analytical reproducibility and collaboration by adopting Git/GitHub version control practices.

AI Intern

YCX Technologies – *Remote, London, United Kingdom*

Jan 2025 – Jun 2025

- Designed and implemented a scalable research database profiling 200+ global game companies, driving internal benchmarking and market analysis.
- Enabled cross-company tech comparisons by classifying firms across 24 AI, cloud, and game innovation metrics.
- Increased research efficiency by 60% through structured data collection processes and validated schema design in Google Sheets.
- Contributed to strategic planning by cataloging proprietary AI technologies and game monetization models.
- Delivered a high-quality research asset used across departments for partnership evaluation and competitive intelligence.

Machine Learning Intern

Vivarattna Technologies – *Bengaluru, India*

Jul 2022 – Sep 2022

- Developed machine learning models that improved prediction accuracy on project datasets by 20%+ using scikit-learn and Python.
 - Accelerated data preparation with effective EDA and feature engineering, enhancing model readiness and training efficiency.
 - Improved simulation fidelity in robotics projects by integrating ML algorithms with sensor data and control logic.
 - Presented analytical findings to cross-functional teams, fostering collaboration and informed development cycles.
-

Skills

Programming & Query Languages

- Python** (pandas, NumPy, Scikit-learn, Matplotlib, Seaborn)
- R** (dplyr, ggplot2, caret)
- SQL** (Joins, CTEs, Window Functions, Subqueries – MySQL, PostgreSQL, BigQuery)

Machine Learning & AI

- Regression, Classification, Clustering
- Time Series Forecasting
- Deep Learning: CNNs, LSTMs (TensorFlow, Keras)
- Model Deployment (Flask, Streamlit basics)
- Hyperparameter Tuning, Cross-validation, Grid Search

Data Analytics & Visualization

- Exploratory Data Analysis (EDA), Statistical Inference
- Data Storytelling using **Tableau**, **Power BI**, and **Plotly**
- Business Intelligence Dashboards for KPIs and Operational Metrics
- Advanced Excel (VLOOKUP/XLOOKUP, pivot tables, dynamic charts)

Statistics & Experimentation

- Hypothesis Testing, A/B Testing
- Linear/Logistic Regression
- Statistical Significance, Confidence Intervals, Probability Theory

Data Engineering & Preprocessing

- Data Cleaning, Feature Engineering, Data Wrangling
- Handling Missing Data, Outlier Detection
- ETL Pipelines using Python & SQL

Tools & Platforms

- Jupyter Notebooks, VS Code, Git/GitHub
- TensorFlow, Scikit-learn, Keras
- Google Sheets, Excel, Power Query

Soft Skills

- Problem Solving, Critical Thinking, Analytical Reasoning
 - Communication with Non-technical Stakeholders
 - Agile Collaboration, Time Management, Version Control with Git
-

Education

Master of Science in Data Science

University of Greenwich, London, United Kingdom

September 2023 – January 2025

Graduated with Merit

Bachelor of Science in Electronics and Communication

Global Academy of Technology, Bangalore, India

August 2018 – August 2022

Graduated with Distinction

Key Projects

Stock Price Prediction using LSTM Neural Network

- Predicted stock prices with an 87% accuracy rate using an LSTM-based model, enabling data-driven investment decisions.
- Enhanced financial data integration and preprocessing pipelines, resulting in significantly improved predictive reliability.

COVID-19 Case Forecasting using Time-Series Models

- Forecasted COVID-19 case trends with 92% accuracy, directly supporting healthcare resource allocation and policy planning.
- Delivered trend and seasonality insights that improved pandemic preparedness and informed strategic actions.

Advanced Stock Price Prediction with Hybrid Models

- Achieved precise stock forecasts using a hybrid model combining LSTM, CNN, and GRU architectures, effectively addressing market volatility.
- Demonstrated the model's impact through reduced forecasting errors and actionable insights for financial stakeholders.
